Aspiring Information Technology professional with practical exposure to full stack development, automation workflows, and AI-based applications. Skilled in building responsive and efficient solutions using modern technologies through project-based and internship experience. Strong in analytical thinking, adaptability, and technical problem-solving. Seeking an opportunity in AI-driven roles to apply technical skills and contribute to innovative real-world solutions.

EDUCATION

2023 - Present

B.Tech – Information Technology

V.S.B. Engineering College, Karur

- **CGPA** : 8.90
- **Key Coursework**: Data Structures and Algorithms, Database Management Systems,, Web Development, Cloud Computing.

Higher Secondary

Ponnu Matriculation Higher Secondary School

Percentage: 88%

SSLC

Ponnu Matriculation Higher Secondary School

Result: All Pass

TECHNICAL SKILLS

Languages: Java , Python

Frontend: HTML5, CSS3, React.js

Backend: Node.js, Express.js

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Docker

AI & Automation: OpenAI APIs, n8n, Integrately

PROFESSIONAL EXPERIENCE

Infosys Virtual Internship 6.0

Nov 2025 - Jan 2026

- Gained hands-on exposure to Java and full-stack application development.
- Built ResolveIT – Smart Grievance and Feedback Management System using Spring Boot and React.
- Strengthened practical knowledge in application development, integration, and project presentation.

Web Development Intern | Hivelance, Madurai

Dec 2024 – Jan 2025

- Contributed to front-end and back-end development activities in a live project setting.
- Built responsive web pages using HTML, CSS, and JavaScript.
- Collaborated with the development team to support feature development and implementation.

PROJECTS

Coding Practice Platform

- Designed and developed a scalable coding practice platform with automated daily question assignment, randomized team distribution, and level-based progression.
- Integrated gamification and AI-based guidance features, including badges, leaderboards, performance tracking, and a chatbot for guided problem-solving.

AI-Powered Workflow Automation Platform

- Built an end-to-end automation platform that converts natural language inputs into executable workflows using structured schema validation.
- Implemented retry logic, idempotency, logging, API rate limiting, and Docker-based deployment for reliable workflow execution.

ADDITIONAL INFORMATION

- **Certifications** : Infosys Virtual Internship 6.0, NPTEL – Programming in Java, AI Career Accelerator (be10x) , AI For Everyone – DeepLearning.AI (Andrew Ng)
- **Languages**: English , Tamil
- **Areas of Interest**: Full Stack Development, AI & Automation, Web Application Development
